If more than one search is submitted, please prioritize searches in order of need.

Please provide a detailed statement of the search topic, and describe as specifically as possible the subject matter to be searched. Include the elected species or structures, keywords, synonyms, acronyms, and registry numbers, and combine with the concept or utility of the invention. Define any terms that may have a special meaning. Give examples or relevant citations, authors, etc, if known. Please attach a copy of the cover sheet, pertinent claims, and abstract.

Title of Invention: Mtd for Mapping Environmental Resources to memory

Inventors (please provide full names): Karl S. Johnson

Earliest Priority Filing Date: May 1996

For Sequence Searches Only Please include all pertinent information (parent, child, divisional, or issued patent numbers) along with the appropriate serial number.

Pls perform a text search for a product called "Raptor
Wire Service Architecture", or "Wire Service Network
Physical Connections", or "Wire Service hardware Wire
architecture".

Author(s): **Johnson, K.S.** (Univ. of Oklahoma, Norman (United States))

Abstract: The Oklahoma Geological Survey has developed several **maps** and reports for preliminary screening of the state of Oklahoma to identify areas that are generally acceptable or unacceptable for disposal of a wide variety of waste materials. These **maps** and reports focus on the geologic and hydrogeologic parameters that must be evaluated in the

screening process. One **map** (and report) shows the outcrop distribution of 35 thick shale or clay units that are generally suitable for use as host rocks for surface disposal of wastes. A second **map** shows the distribution of unconsolidated alluvial and terrace-deposit aquifers, and a third **map** shows the distribution and hydrologic character of bedrock aquifers and their recharge areas. These latter two **maps** show the areas in the state where special attention must be exercised in permitting storage...

...that could degrade the quality of groundwater. State regulatory agencies and industry are using these **maps** and reports in preliminary screening of the state to identify potential disposal sites. These **maps** in no way replace the need for site-specific investigations to prove (or disprove) the...
